Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens US Patent No. 5,370,685 in view of Rudko et al. US Patent No. 5,830,210.

Stevens discloses apparatus and method for replacement of heart valve, comprising the steps of: introducing a lumen within the vasculature of a patient proximate a heart valve to be resected; introducing ablative mechanical energy into the lumen; and rotating the lumen to resect the heart valve. However, he fails to teach the use of optical energy and delivery optical fibers to provide the tissue removal/treatment energy as presently claimed.

Rudko et al. disclose an alternative endovascular tissue removal device in which plurality of optical fibers disposed on an expandable member deliver ablative laser energy to a desired tissue location. Therefore, at the time of the applicant's invention, it would have been obvious to one skilled in the art to use optical energy and a delivery system as an equivalent alternative means to the mechanical energy of Stevens in order to remove a desired vascular tissue.
